Dear lover of books!

You are all making so many books that we can barely keep up... and hence some growing pains!

We would like start with apologizing for the newsletters that some of you may receive even though you have cancelled your subscription. We are working on solving this issue. Please bear with us until further notice, thank you.

Also, we were not able to receive any customer service related e-mails this weekend (April 23rd through April 26th). If you tried to reach us during this time and we didn't get back to you, please e-mail us again at info@solentro.com and we will reply to you as soon as possible. Once again, thank you and we are very sorry for the inconvenience.

Luckily I have some good news as well!

At Solentro you are used to the fact that you can make your own book in our system, however, if you are familiar with some kind of photo editing software (e.g. InDesign) you can **create your own design and have full creative control of how your book will be!**

The **Solentro** school, lesson 2:

Create your own design in the software of your choice, save each page in High Resolution as a Jpeg-file (300 dpi). Click on MY PICTURES and choose upload photo - it is possible to cover a whole page with a photo or only cover part of the page. Drag the photo that covers the whole page - this is how you customize your own book. You have to click on PREVIEW to be able to see how your book will be.

Keep in mind that the images you create may be different in style and try not to put important information near the edges.

Depending on the type of book you choose, the books are cropped slightly different. The procedure for a hard cover book is not the same as for a spiral bound book where the binding enters part of the book. For more information see our [Terms & Conditions](#).

Always preview your book in the PREVIEW-mode before you place your order.

Good luck with your next book project!

/Hampus & Tobias Schildfat, brothers and founders
